Successful Project Cases

Africa Integrated Solar-Storage-Charging Energy Station

EON provides an integrated solar-storage-charging station solution for Africa’ s urban public transport scenarios. Addressing grid instability, high load shedding risk and heavy charging demand at bus depots, the solution integrates high-power DC fast charging, solar PV generation, BESS energy storage and an intelligent energy management platform.
To date, we have provided full charging station solutions and supporting equipment for dozens of projects in South Africa, Ethiopia, Angola, Algeria and other regions.
