# Successful Project Cases

## Brazil São Paulo Urban Electric Bus Charging Depot

EON delivered high-power DC fast charging stations for Brazilian public bus depots. Equipped with intelligent charging scheduling and auxiliary BESS, the system solves grid peak load pressure, supports simultaneous charging for 40+ electric buses, reducing operational costs and failure rates significantly.Meanwhile, our chargers have been exported to Paraguay, Uruguay, Chile and other countries, with the total quantity exceeding 500 units, and they have won wide recognition among local new energy vehicle owners.
